RELEASE 55[®] ASPHALT RELEASE AGENT PRODUCT DATA SHEET

RELEASE 55[®] Asphalt Release Agent is a proprietary, engineered formulation made from environmentally safe and renewable agricultural based compounds, specifically designed for the Asphalt Industry.

- DOT approved, non toxic, non hazardous, non corrosive.
- Product proven to be effective for equipment and truck box release coating, that typically is attempted with petroleum products, alcohols, soap agents.
- Can be employed on rollers both vibratory or static, in preventing ACC granular build up.
- Will minimally cover 2-3 times the surface area than petroleum or water based agents.
- May retain anti-bonding capabilities more than one hopper truck load based on time of static load.

RELEASE 55[®] Asphalt Release Agent for roller tank mix is 100% soluble with water.

RELEASE 55[®] Asphalt Release Agent is 100% organic, will not alter ACC mix.

RELEASE 55[®] Asphalt Release Agent is completely Safe for Employees and Environment.

RELEASE 55[®] is available in Semi Load, 4,500 gal., Tote, 250 gal., Drum, 55 gal.

RELEASE 55[®] available in concentrate or ready to use formulation.
